WORK EXPERIENCE

○ Jan 2023- Present

Cubic Telecom | Dublin, Ireland

Provide connectivity to mobile assets such as cars, trucks, tractors, and drones

Lead Product Manager

- Owned P&L and led a team of 3 product managers across two data products (INSIGHTS & PLXOR) and the agriculture segment
- Initiated and presented a business case to the senior leadership team (SLT), securing a multimillion-euro, 5-year investment in the agriculture segment
- Redefined INSIGHTS strategy, streamlining existing features into core platform "tablestakes" reporting, and developed additional monetizable capabilities, performing a pilot with a customer fleet of 4.5M vehicles within a year
- Repositioned PLXOR from a technical product to a use case-driven solution with a revamped pricing and go-to-market (GTM) strategy, building a late-stage pipeline of 5 deals worth millions in total contract value (TCV)
- Coached PLXOR PM through new market launch, taking their first customer live (SiriusXM Canada)

○ Aug 2021 - Dec 2022

Wayflyer | Dublin, Ireland

Provide financing to ecommerce businesses

Senior Product Manager

- Defined the integration strategy and managed vendor relationships with third-party data providers to ensure seamless, scalable connections.
- Reduced time-to-market for new integrations from months to weeks by creating a reusable framework and playbook, improving speed and scalability
- Cut integration-related customer acquisition costs (CAC) by 90% through optimized integration design and strategic vendor negotiations
- Collaborated with Data and Platform teams to implement robust access controls and data retention policies, enhancing security for customer data
- Increased customer signup rates through sales education and joining sales calls to reassure customer IT and data protection officer (DPO) representatives of our security and retention policies

Aug 2020 - Aug 2021

ESW | Dublin, Ireland

Provide cross-border ecommerce solutions to DTC brands expanding globally

Product Manager, Data & Analytics

- First product person for the data space, across Data Engineering, BI, and Data Science teams
- Reduced time for finance team to perform financial settlement with customers by 75 hours per month through design and delivery of a standardized and automated reporting process
- Reduced time for the AR and Treasury teams to perform cash reconciliation and reporting by more than 20 hours per month through integration with payment service providers
- Created a new product via a buy process of a new Customer Data Platform
- Led the build-or-buy analysis of a new applied data science service offering
- Enabled faster business, product, and build vs. buy decision making by creating in-house data science capabilities in sales forecasting, product recommendations, product classification, and logistics performance analysis
- Partnered with Chief Product Officer to create a proposal for the board to provide dedicated innovation funding and structures in the organization, ensuring a pipeline of new business strategies beyond incremental innovation

Oct 2016 - Aug 2020

Oneview Healthcare | Chicago, Illinois & Dublin, Ireland

Provide in-room patient entertainment and education hardware and software

Product Manager, Care Experience Platform & Data Platform

- Researched and created a new product strategy to adapt to market changes expected post-COVID, presented to global leadership team and board of directors, and obtained stakeholder buy-in and support to implement the strategy company-wide
- Created product and go-to-market strategies for a cloud version of our product to support hospitals during COVID-19, going from ideation to launch in two weeks
- Led the product to increased stability and performance, enabling a 36% increase in live on-premise devices in a single 6 month period
- Developed launch plan and brought Data Platform live, reducing time to generate customer reports from days to real time and fully automated

Outcomes Manager

- Analysed performance metrics and worked with clinical staff to improve process
- Partnered with clinical hospital leadership to identify strategic priorities for the Oneview project, gather baselines, and set post-live targets to ensure success against strategic priorities

Jun 2013 - Oct 2016

Epic | Verona, Wisconsin

Provide ERP systems for large health systems

Project Manager, Billing & Analytics Applications

- Coordinated team responsible for Epic's population health product go-to-market strategy
- Owned market and competitor research, implementation planning, and demoing to prospective customers for the population health product
- Account and Project Manager for the population health and analytics products at multiple large health systems
- Coordinated a multi-year, multi-hospital implementation and optimization of Epic's hospital billing and data analytics applications
- Responsible for line management of entry level project managers as well as coaching of entry and mid-level project management staff assigned to my projects/accounts
